Profile

Full-stack systems engineer who enjoys owning a feature end to end. I build web applications with React, Angular and Next.js on top of APIs in Node.js, Python, Java and .NET, and I extend and integrate Microsoft Dynamics 365 Business Central: electronic invoicing with tax certification providers (PACs), integration APIs and reporting.

Experience

Senior AL Developer | 4 Ways Tech · *Remote* Mar 2026 – Present

- **Electronic invoicing (e-CF, Dominican Republic)** with the SERES PAC from Business Central: fiscal XML for Fiscal Credit (31) and Consumer (32) invoices and credit notes, and a SOAP service with WS-Security for submission and status queries.
- **14 RDL/RDLC reports** built from scratch for 8 clients (cash reconciliation, AR/AP aging, trial balance, withholding certificates, among others) and **13 layouts** of invoices, purchase orders and checks improved.
- **Integration APIs:** API pages for external systems (items, units of measure, dimension values) backed by an integration log table and codeunit that make every call traceable.
- **Production support:** fixes to AL extension defects (dimensions, permissions, bank export files) and refactoring of obsoleted code after upgrades.

Business Central Developer | LLB Solutions · *Barranquilla, Colombia* Jun 2025 – Mar 2026

- Designed, developed and implemented custom Business Central solutions for each client's business needs, working closely with functional consultants.
- Extended the ERP in AL with reports, pages and integrations with external systems, plus automated tests to reduce regressions.

Fullstack Developer | Wizzybot · *Barranquilla, Colombia* Apr 2025 – May 2025

- Designed and integrated REST APIs between internal tools and third-party services.

Selected projects

- **OrderFlow** (*NestJS, FastAPI, Fastify, Redis Streams, React, Docker*): five microservices with a choreographed saga, transactional outbox, idempotent consumers, compensation and an API gateway with circuit breakers; end-to-end saga test in CI.
- **Finance Tracker** (*Fastify, Drizzle ORM, PostgreSQL, Zod, Next.js*): REST API protected by an API key behind server-side proxy routes; transactions categorized by a language model.
- **DocuChat AI** (*FastAPI, ChromaDB, Gemini, React*): RAG over PDFs with streamed (SSE) answers and page-level citations.
- **LinkVault** (*Next.js 16, Server Actions, Prisma, Auth.js*): optimistic updates, GitHub OAuth, i18n and an SSRF guard.

Technical skills

- **Front-end:** React, Next.js, Angular, TypeScript, Tailwind CSS, Astro, HTMX, TanStack Query
- **Back-end:** Node.js, NestJS, Fastify, FastAPI, Django, Spring Boot, JEE/JPA, ASP.NET
- **Languages:** TypeScript, JavaScript, Python, Java, C#, SQL, AL
- **Integrations & data:** REST, GraphQL, SOAP, WS-Security, JWT, OAuth 2.0, XML, RAG; PostgreSQL, SQL Server, MySQL, DB2, DynamoDB, Redis
- **Architecture & DevOps:** microservices, event-driven design, design patterns, unit and integration testing, Docker, GitHub Actions, CI/CD, AWS, Azure

Education & certifications

B.Sc. Systems Engineering | Universidad del Norte — *Distinguished student and scholarship holder*

2024

Microsoft Certified: Dynamics 365 Business Central Developer Associate (MB-820) — Microsoft, 2025

Languages: Spanish (native), English (B2)
